

The list of targeted resources by French universities or institutions is given below. A contact person for the use of targeted resources within projects is provided for each institution. The contact person may also be Jean-Pierre Raymond : jean-pierre.raymond@math.univ-toulouse.fr

List of targeted resources.

Université Paul Sabatier Toulouse III.

I - Two invited professor positions every academic year – each for one month. These positions are for Indian faculty members who are members of a project or a forthcoming project and who are invited by a colleague from UPS. The demand has to be done by the French inviting colleagues in June for an invitation during the next academic year.

II - 2 or 3 months of visits or internship every year open for PhD students, or Master students who are interested in eventually continuing a PhD thesis funded by Université Paul Sabatier Toulouse III. If these positions are not used by PhD or Master Students, they can be used for a two months visit of a post doctorate. These visits must be preferably part of a project.

III - One full PhD fellowship is available during the period 2014-2016. The thesis must start before the end of 2016. The areas of research cover all the topics in applied mathematics and topics at the interface between applied mathematics and computer science, engineering, or physics. Before applying the candidates have to spend some internship period (2-3 months) in Université Paul Sabatier (supported by targeted resources) in order to find an advisor and to prepare the proposal for the thesis. The application has to be done in May for a thesis beginning in September or October. Contact person at Université Paul Sabatier: jean-pierre.raymond@math.univ-toulouse.fr

Université de Nice Sophia Antipolis. The university will support visits from Indian colleagues to Université de Nice or visits from French colleagues to a partner of IFCAM in India. The total duration of supported visits is between 2 and 3 months each year. These visits are done within projects. Contact person at Université de Nice Sophia Antipolis : Pascal Chossat, pascal.chossat@unice.fr

Ecole Normale Supérieure de Paris. One month invited professor position every academic year. These positions are for Indian faculty members who are members of a project or a forthcoming project and who are invited by a colleague from ENS Paris. The application will be reviewed by the Scientific Committee from ENS-Paris. Contact person at Ecole Normale Supérieure de Paris : Yves Laszlo, yves.laszlo@ens.fr

Ecole Polytechnique. Several internships are available at the Master level in labs from Ecole Polytechnique. After these training periods some of the Master students could be authorized to continue a PhD thesis funded by Ecole Polytechnique. Contact person at Ecole Polytechnique: Frédéric Coquel, frederic.coquel@cmap.polytechnique.fr

Inria. Inria provides supports for visits of researchers and internships for master or Phd students for IFCAM projects involving Inria members. There is also a possibility to apply for one post-doc position (currently the position is filled). Contact person at Inria: Hélène Kirchner, helene.kirchner@inria.fr
